## Structural Health Monitoring based on Vehicle Bridge Interaction

报告人：朱信群教授

报告时间：2016年12月28日 10:00

地点：安中大楼 A322

Dr Xinqun Zhu obtained his PhD at the Hong Kong Polytechnic University in 2001. Currently, he is an Associate Professor in Structural Engineering at Western Sydney University. Dr Zhu has published over 170 articles including 95 referred journal papers with a Scopus-h index of 23. His research interests include structural health monitoring and condition assessment,

Bridge Weigh-In-Motion, Steel-Concrete Composite Structures, advanced signal processing and sensor technology. He is a member of the American Society of Civil Engineers (ASCE), the Executive Committee of Australian Network of Structural Health Monitoring and the Structural Health Monitoring and Control Committee in Engineering Mechanics Institute of ASCE. He is also an Associate Editor of international Journal of Advances in Structural Engineering.
