RECOMMENDATION LETTER

It is my immense pleasure to recommend Mr. Sarfraz Hyder for his future studies. Having had the privilege of teaching Sarfraz during his undergraduate studies in Civil Engineering department, I whole-heartedly endorse this application.

I have taught him courses like Environmental Engineering and Surveying. In the classroom, I always found him to be committed about his work. He was among the top 5 students of my class. Sarfraz is a remarkable student with strong academic foundation and an impressive research work. His research was on substitutes of cement for sustainable construction and waste reduction, where he demonstrated his keen interest in sustainable construction and environmental development.

In addition to his academic prowess, Sarfraz was actively engaged in extracurricular activities, including participation in university events and sports. His involvement in these activities demonstrates his ability to balance his academics with social skills, which will undoubtedly make him a valuable asset in your program.

Therefore, I would like to restate my strong recommendation for Sarfraz and hope that his application will have your favorable consideration. I have no doubt that he will make significant contributions both academically and socially.

If you have any further questions about him, please feel free to contact me at my Email: jaffarmemon@muethkp.edu.pk.
