Dear Committee members,

It is a great pleasure and enthusiasm that I am writing to endorse Mr. Lodompui Pelly Maiden, application for the Master's Degree in Civil Engineering program at your university. For the last 20 years at Harbin Institute of Technology, I have been an Associate professor, as well as a mentor to many interns and engineering students.

I have known Mr. Lodompui Pelly Maiden for almost four years. The first time, I met him as her teacher in the class,

Chemical Engineering in Civil engineering for undergraduates. After that, I taught him another course, Environmental Chemicals. I was also in charge of the short internship and fieldwork that he and some of his classmates did in the ongoing Harbin subway construction project. Having known him so closely for the last four years, I hope my perspective will be helpful to you as you evaluate him.

From the period I knew him, Mr. Lodompui Pelly Maiden has distinguished himself as a conscientious, hardworking, and energetic student. While actively participating in class discussions and other presentations, he has often made critical points that demonstrated his outstanding ability to read critically and successfully analyze recondite materials. The same thinking appears in his written work as well.

I can assure you that he has a good foundation for his intended program. This would make him an ideal candidate for the scholarship program, he would be coming to your university with the qualities of a natural leader, intelligence, and integrity. I would like to restate my strong recommendation for Lodompui Pelly Maiden's admission to your University. I believe he will be one promising and distinguished student who deserves to be given a Scholarship.

If you have any further questions regarding Lodompui Pelly Maiden's ability or this recommendation, please feel free to contact me, Thank you.

Yours sincerely,

阿珠

Dr. Lizhu Zhang.
