

To whom it may concern,

This letter is intended to recommend Mr. YAZAN ABDELHALIM IBRAHIM ALSAKARNEH to attend your postgraduate programme. Since he attended my course at the China University of Geosciences in 2022, I have gradually built up a comprehensive view of his abilities in educational and social settings. I believe that he can be an excellent candidate for your institution.

As a lecturer in the Instructive Practice for Major, Bridge Engineering, and Course Design for Bridge Engineering, I have had sufficient time to closely observe his personal development and study performance in numerous situations. In class, he was a motivated learner who engaged in classroom activities actively, participating in group discussions attentively and raising thoughtful questions based on reflections on the relevant content. It is worth mentioning that his eye-catching performance let him stand out as an excellent student in my course.

In conclusion, I am very pleased to say that YAZAN is a promising and mature young man who treats everything seriously. I believe that his responsibility and carefulness can assist him in welling handling tasks in the next stage of education. Please feel free to contact me if you have any further questions.

Sincerely,

Lan Ding, Associate Professor
