

PhD Studentship in Structural Engineering

An opportunity exists for an excellent student to study for a PhD degree in the Department of Civil and Structural Engineering of the The Hong Kong Polytechnic University under the supervision of Prof. Jin-Guang Teng. The student may choose to work in one of the following three areas:

- (1) Fiber-reinforced polymer composites in structures
- (2) Steel structures/steel-concrete composite structures
- (3) Life-cycle structural engineering

Applicants must possess the following qualifications/attributes:

- (1) A bachelor degree in civil engineering with academic results being within the top 10% of the class from a reputable university.
- (2) A master degree from a reputable university or completion of the coursework component of a Master degree or PhD degree programme at a reputable university.
- (3) A strong interest in pursuing an academic/research career;
- (4) Competency and interest in both theoretical/numerical and experimental work; and
- (5) A good command of the English language that meets the admission requirement of the University.

The successful applicant will receive a monthly stipend of HK\$ 13,800 per month for three years, provided satisfactory progress is made.

If you meet the above requirements and are interested in the studentship, please email your CV with a short personal statement explaining why you are interested in the studentship to Professor Jin-Guang Teng at cejgteng@polyu.edu.hk by **25 May 2011**. Short-listed candidates will be interviewed either in person during 27 to 29 May or over the phone.
